Instagrid
Customer Care Team
Ludwigsburg

Stuttgart, 28 October 2026

Application: Working Student, Customer Care (f/m/d)

Dear Instagrid Team,

Keeping a live Pilot Fleet of battery power systems ready whenever Sales needs it, with accurate data behind it, is practical work with real ownership. I would like to do that alongside my studies. I am an M.Sc. Electrical Engineering student at the University of Stuttgart (specialisation Electrical Power Systems), and I have studied battery modeling in depth.

I do not have customer care or logistics experience, and I have not worked with Salesforce, NetSuite, Jira or Confluence. What I bring is a hands-on, structured way of working and a feel for batteries: in a university project, I analysed how electrical, thermal, aging and manufacturing tolerances change cell behaviour. I track and report data carefully in Python, and I use AI tools such as Claude and ChatGPT in my work. I am used to keeping several tasks moving at once.

The idea of fleet reporting (utilisation, turnaround time, conversion) and documenting standard procedures fits how I like to work, and I would like to learn your enterprise tools quickly. My English is at C1 level (IELTS Academic 7.5), and my German is currently A2, which I understand is a nice-to-have.

I can work 16 to 20 hours per week on-site in Ludwigsburg, with more capacity during semester breaks. I currently hold a Fiktionsbescheinigung while my residence permit is being processed, and I will share the details as soon as you need them. I would be glad to talk.

Kind regards,

Vineeth Raghav Gururajan
