Application: Working Student Digital Workplace (m/f/d)

Dear Ms Altinova and IT team,

I study Electrical Engineering (M.Sc.) at the University of Stuttgart and would like to join your IT team as a working student. Being the first contact for colleagues, finding a practical fix and writing it down so the next person finds it faster is work I enjoy.

My B.Tech. gave me solid IT foundations, with grades of A or better in IT Infrastructure Management, Network Security, Operating Systems and Databases. In a team of four, I took a machine-learning model to 88.3% accuracy and deployed it as a web application. I have also taught electronics and coding to beginners in volunteer workshops, which is where I learned to explain technology without jargon.

I know Outlook, Teams, SharePoint and OneDrive as a user. The Admin Center, Entra ID and Power Automate are new to me, and I want to learn them with your guidance.

My English is at C1 level (IELTS Academic 7.5) and my German is A2, which I am improving for the telc B1 exam. I can work about 20 hours per week from December 2026 and travel to Stuttgart on site. I currently hold a Fiktionsbescheinigung while my residence permit is being processed, and I will provide the documents you need.

Kind regards,

Vineeth Raghav Gururajan
