Internal IT Team
Mannheim

Stuttgart, 28 October 2026

Application: Working Student, IT Support (m/f/x)

Dear Internal IT Team,

Keeping colleagues productive across the world, with a quick and competent answer to every IT question, is a role where small things matter. I enjoy exactly that: finding the cause of a problem and explaining the fix clearly. I am an M.Sc. Electrical Engineering student at the University of Stuttgart (specialisation Electrical Power Systems), and I am applying for your Working Student IT Support position.

I do not have helpdesk or ticketing experience, and I have not administered Microsoft 365, Windows or macOS environments professionally. What I bring is a technical base and the right habits. My B.Tech. included IT Infrastructure Management, Cryptography and Network Security, Embedded Hardware and Operating Systems, and Hardware Interfacing and Networking, with grades of A or higher. I debug and document my work carefully, and I have volunteered as an instructor in STEM workshops, which taught me to explain technical topics to people without a technical background.

Your focus on process improvement and AI-based automation also appeals to me. In a university project, I built a machine-learning classifier in Python that reached 88.3% accuracy and deployed it as a web application. I would like to apply that mindset to your internal IT processes.

My English is at C1 level (IELTS Academic 7.5), and my German is currently A2, so I am glad your posting treats German as a plus. I can work up to 20 hours per week, hybrid from Mannheim, and I am happy to agree a start date. I hold a Fiktionsbescheinigung while my residence permit is being processed, and I will share the details as soon as you need them.

Kind regards,

Vineeth Raghav Gururajan
