## ABOUT ME

I am an Electrical Engineering student from India, now doing my Master's in Stuttgart (Electrical Power Systems) after a B.Tech. in Chennai. Batteries are part of my studies: I built a battery cell model and analysed its variance statistically. I work carefully, document my results and like evaluating data with Python and MATLAB. My English is C1 and my German is A2 (preparing for B1). I am looking for a working student role in LV on-board batteries, 20 hours per week.

## EDUCATION

10/2025 – 09/2027 (expected)
**M.Sc. Electrical Engineering, University of Stuttgart**
Specialisation Electrical Power Systems

08/2021 – 05/2025
**B.Tech. Electronics and Computer Engineering, SRM Institute of Science and Technology, Chennai**
A or better in IT Infrastructure Management, Cryptography and Network Security, Embedded Hardware and Operating Systems, Hardware Interfacing and Networking, Database Management Systems.

## RESULTS

11/2025 – 03/2026
**Battery Cell Modeling, University of Stuttgart**

- Quantified cell-to-cell variance from electrical, thermal, aging and manufacturing tolerances with statistical parameter sampling.
- Debugged the simulation model and documented results with the team.

11/2024
**Duplicate Question Detection, team of 4**

- Python data analysis: 88.3% accuracy (SVM) and 80.02% (Random Forest), above the 75–81% of the published approaches reviewed.

12/2024 – 01/2025
**64-bit RoBA Multiplier with MAC Unit, final-year project (A+)**

- Designed in Verilog and synthesised in Xilinx ISE, critical path 0.575 ns.
